Introduction

THE PURPOSE OF CAREER CRUISING

Career Cruising has been developed with one goal in mind: making a comprehensive career guide that people will truly enjoy using.

While in school, we noticed a common problem among our peers—few of us knew what to do with our lives after graduation. Our understanding of our career options was very limited, and often based more on inaccurate stereotypes than the reality of the working world.

To address these problems, we set out to create a career guidance resource that would have appealed to us when we were in school. Our aim with the initial version of Career Cruising was to develop a user-friendly program that combined comprehensive career information with the personal perspective provided by multimedia interviews with people in every occupation.

Over the years, we have responded to the needs of Career Cruising users by adding a number of additional features: first-class assessment, a comprehensive post-secondary schools database, financial aid information, a portfolio tool, employment resources, and helpful administrative features.

The ongoing development of Career Cruising is a labour of love for all of our staff. It is our hope that Career Cruising will engage and inspire all of our users to achieve their full potential in school, career, and life.

WHO CAN BENEFIT FROM CAREER CRUISING?

Career Cruising is suitable for people from 6th grade to adulthood. It is a user-friendly program and requires no special training or expertise. Career Cruising is particularly useful for:

- **middle school students** starting to learn about various career choices and the relationship between their schoolwork and the working world
- **secondary school students** in the 9th and 10th grades investigating occupations and planning for the future
- **secondary school students** in the 11th and 12th grades making decisions about training, post-secondary study, and work
- **college and university students** learning about careers related to their field of study
- **unemployed adults and young people** evaluating their options and beginning a work search
- **employed adults** considering a career change

Introduction

INDIVIDUAL CAREER GUIDANCE

Career Cruising is designed for individual, self-directed use. The user-friendly interface helps users satisfy five key career guidance needs: self-assessment, career exploration, post-secondary education planning, work search, and portfolio development.

Each of these sections can be used on its own. For instance, someone interested in exploring careers could spend days learning about different careers and viewing the multimedia interviews with people in those careers.

However, the sections can also be used in combination. You can learn more about your personal interests and find related careers and information about required training; you can explore occupations that interest you and search for related jobs; you can explore schools in your state and find financial aid programs you qualify for; or you can use any other combination of the features and tools available in Career Cruising to help you develop a clear plan for your future.

We encourage you to go through at least the following steps:

Step 1: Develop a personal Plan

The My Plan tool can be used throughout the career exploration and planning process. When using any component of Career Cruising or participating in any other career development activities, you can save your work and document your activities in your Plan. Developing a Plan allows you to continually build on your previous career exploration work. Also, you will be creating a document that can be used to present yourself to prospective employers, post-secondary school admissions staff, and others.

Step 2: Self-Assessment

Start off with the Career Matchmaker assessment. Matchmaker helps you discover your work interests and provides you with a list of suggested careers.

Step 3: Explore Careers

Click on one of the suggested careers to go to its summary page where you will find key information about the career, including core tasks, earnings, and education and training requirements. If the career interests you, explore each section of the occupation profile in depth and view multimedia interviews with real people in the occupation.

Step 4: Plan Education and Training

The Explore Education section provides information on where to get the required education and training. For instance, if you are interested in becoming a graphic designer, you can use the Search For Programs feature to find colleges offering programs in graphic design. You can also go directly to those

Introduction

school profiles by using the Related College Programs links in the Education section of the graphic designer occupation profile.

This User's Guide describes the features and functions of Career Cruising's career exploration and planning tools. For additional information and tips on getting the most out of Career Cruising, please consult our support documents in the Help section, or contact your client account manager.

We hope you enjoy exploring the program! If you have any questions, comments or suggestions for our team, please don't hesitate to contact us at support@careercruising.com.

CAREER MATCHMAKER

Career Matchmaker is a great starting point for people who want to find careers that suit their interests. Based on one of the most respected interest assessment tools in the world, Matchmaker is an interactive survey that matches your occupations to your interests.

Explore Assessments

Career Matchmaker starts by asking 39 questions about your likes and dislikes. For each question, there are 5 responses to choose from: **Dislike Very Much**, **Dislike**, **Does Not Matter**, **Like**, or **Like Very Much**.

Once you have completed the first stage of the survey, Matchmaker produces a list of 40 career suggestions. The occupations on the list are ranked according to how well they suit your identified interests.

(Note: This is just the first round of questions; we strongly recommend answering the additional questions. Please see the [Improve My Results](#) section below for more information.)

The screenshot shows the Career Cruising Matchmaker interface. At the top, the user's name is Roshni, and the progress bar indicates 100% completion. The current question is "How would you like a career which includes..." with a sub-question "Presenting ideas and information in writing". The response options are Dislike very much, Dislike, Does not matter, Like, and Like Very Much. A "More Info" box provides details on what this skill entails.

Likes and Dislikes

In addition to exploring the list of suggested careers, there are a number of other options available on the Career Suggestions page:

- **Career Cluster Recommendations** –Matchmaker also identifies career clusters or career pathways that match your interests. Select a cluster to see which careers from your suggestion list are included in that cluster.
- **Level of Education** – This feature allows you to specify the level of education and training you plan to complete, or have already completed, and have Matchmaker tailor the list of suggested careers to reflect your intended level of education and training. Select an option and click the

Explore Assessments

Update My Results button so that only occupations that meet your selected education criteria will be displayed.

The main content area is titled 'Matchmaker' and lists 'Career Interest Rank' with five recommendations:

- Machinist**: Machinists use machine tools, such as lathes, milling machines, and machining centres, to craft precision metal parts.
- Tool and Die Maker**: Tool and die makers create precision metal parts (tools, dies, and moulds) that are used to manufacture all sorts of goods.
- Miner (Underground)**: Miners drill tunnels underground and remove materials such as metal ores, rock, or coal.
- Production Woodworker**: Production woodworkers transform raw wood into useable lumber and other products, or work in factories making things like furniture.
- Sheet Metal Worker**

On the left side, there are two filter panels. The 'Career Cluster Recommendations' panel has three options: 'Skilled Trades', 'Architecture & Construction', and 'All Clusters' (which is selected). The 'Level of Education' panel has three options: 'High School' (selected), 'Community College or Technical Training' (selected), and 'University' (selected). An 'Update My Results' button is located at the bottom of the education filter panel.

Matchmaker Results

The more questions you answer, the more effective Matchmaker is at suggesting careers that suit your interests. Click on the **Answer More Questions** button to continue with Career Matchmaker. You can also click on the **Review My Answers** button to view a list of your responses to all of the questions you have answered so far. You can make changes to any of your responses and then update your suggested careers list based on the new responses.
- Other Careers** – If careers you are interested in do not appear on your list of suggestions, use this feature to find out why. Click the **Find Careers** button to search for a career and then view the Suitable For You? information to see which aspects of the career you indicated you dislike.

MULTIPLE MATCHMAKER RESULTS

Keeping multiple Matchmaker results allows you to see how your interests evolve over time and to reflect on how your changing interests influence your career suggestions. Before beginning a Matchmaker session, you will be prompted to label the session. All results are automatically saved in the My Assessments section of My Plan.

Explore Assessments

If you have completed multiple Matchmaker sessions, you can indicate which result set is your Best Match. Your most recent session defaults as your Best Match, but you can choose any session that best reflects your current career interests.

MY SKILLS

This section of Career Matchmaker helps you see how your skills match up with the careers that interest you. You must complete at least the first 39 questions of Matchmaker in order to access the My Skills assessment.

To complete the assessment, rate your skill level in the 45 skill set areas. For each skill there are five options to choose from: **I Am Highly Skilled**, **I Am Skilled**, **I Have Some Skill**, **I Don't Have This Skill**, or **I Can't Answer This**.

You can revisit and change your My Skills answers by clicking on the **Review My Answers** button in the My Skills section of the Career Suggestions page.

The results of the My Skills assessment can be used in 2 different ways:

- Younger students or individuals who have not had the opportunity to develop job-related skills may use their results to determine which areas they need to work on in order to prepare themselves for a particular career.
- Individuals planning to enter the workforce immediately can review their skills assessment results to help determine whether or not they are adequately prepared to pursue employment opportunities in a particular field.
